

PATIENTS INSIGHTS

Half of the patients have taken one vaccine dose. There is still a large proportion of patients who remain unvaccinated (42%). It is noteworthy that there are no patients above 60 years old. Most of the patients belong to the 20-40 age group. More than half of the patients in age group 0-10 and 40-60 are still unvaccinated.

STAFF INSIGHTS

Interestingly, there are no doctors on vaccination duty at the Malmi station on Tuesday, Wednesday and Thursday. Similarly, Myyrmäki's Vaccination Center does not officially have any doctors on vaccination duty on Monday and Tuesday.
